

INJECTO
We Weave Excellence

The Best Choice For Your Packaging Needs.

We are manufacturer of PP/HDPE/BOPP/FIBC/Leno Bags/Shopping Bags/Pouches and many more.

ISO: 9001 Certified | Having BIS registration for Sugar, Cement and Foodgrain Bags.

About Us

Injecto Polymers Limited (IPL), formerly known as Injecto Polymers Private Limited, is a leading manufacturer in the packaging industry with a legacy rooted in over three decades of trading and manufacturing experience. Incorporated on September 4, 1998, under the Companies Act, 1956, and having its registered office at 18, Rabindra Sarani, Poddar Court, Gate No 3, 5th Floor, Kolkata – 700001, the company was reconstituted as a public limited entity on July 6, 2024, reflecting its growth ambitions and expanded vision.

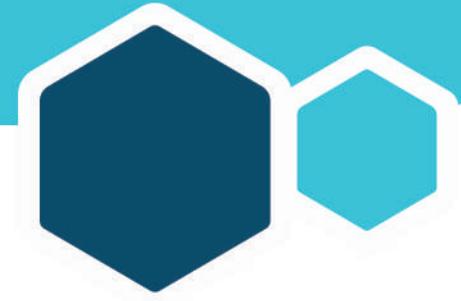

Founded by two seasoned entrepreneurs, Mr. Ramesh Kumar Rateria and Mr. Ashok Kumar Rateria, IPL continues to benefit from their deep industry knowledge and robust business acumen. The Rateria family's involvement in the packaging industry spans multiple generations, evolving alongside the industry's transition from jute-based solutions to modern plastic polymer-based alternatives.

Legacy & Background

The Rateria Group's journey began in the traditional jute packaging business, which dominated the Indian packaging landscape for decades. As market dynamics shifted due to jute shortages and technological advancements, the group seamlessly transitioned into plastic-based packaging materials.

In the early 1990s, under the leadership of Mr. Ramesh Kumar Rateria (FCA), the group ventured into the trading of polyolefins in Eastern India, initially through imports and later in partnership with major Indian producers. Notably, in 2000, the group partnered with GAIL (India) Ltd. as a Direct Sales Agent (DSA) to develop a market for polyolefins in the region.

In 2007, the Rateria Group acquired Hind Polyfabs Pvt. Ltd., a pioneer in HDPE/PP woven fabric and bag manufacturing in Eastern India, previously managed by the Radico Khaitan Group. The plant, located in Andul, Howrah, has been consistently upgraded to incorporate the latest manufacturing technologies, with the most recent major expansion undertaken in 2015.

Manufacturing Footprint and Expansion

Existing Facilities

Abujhati Unit (Phase I & II):

- * Location: Industrial Hub, Abujhati, West Bengal
- * Phase I Capacity (2019): 3,700 MT per annum
- * Phase II Expansion (2021): 4,770 MT per annum
- * Total Capacity (Phases I & II): 8,470 MT per annum
- * Infrastructure: Combined land bank of 262 decimal with over 67,000 sq. ft. of factory sheds, labor quarters, and canteen facilities

Panchpara Unit (Acquired in 2024):

- * Location: Panchpara, Near Andul Road, Howrah
- * Product Range: PP/HDPE-based woven sacks and fabrics for cement, fertilizer, food grains, etc.
- * Annual Capacity: 2,400 MT
- * Land & Build-Up Area: 26,000 sq. ft. land with 27,642 sq. ft. constructed area

Sustainability Initiatives

In FY 2024–25, the company took a significant step towards sustainability by installing a rooftop solar power plant for captive consumption with assistance from SIDBI, reinforcing its commitment to green energy. Simultaneously, IPL enhanced in-house capabilities with value-added installations including printing units, sewing machines, and bale pressing equipment.

Ongoing & Future Expansion

The company is presently executing a major expansion project involving:

- * New Manufacturing Line: Additional 2,400 MT annual capacity
- * Purpose: Captive production for downstream processes such as lamination, multi-filament extrusion, and pouching
- * Infrastructure: 96 decimal land bank, 22,098 sq. ft. factory shed, and 52,045 sq. ft. multi-storeyed building
- * Funding: Financial closure completed with SIDBI

Proposed IPO-Backed Expansion

As part of its IPO strategy, IPL plans to:

- * Set up a new high-capacity plant at Abujhati
- * Proposed Annual Capacity: 4,800 MT Per Annum
- * Land Bank: 79 decimal already acquired
- * Factory Shed: Approx. 70,000 sq. ft.

Upon completion of this phase, the total cumulative production capacity of IPL is projected to reach approximately 18,070 MT per annum, positioning the company among the top-tier players in the Eastern Indian packaging segment.

Vision and Strategic Direction

Injecto Polymers Limited is committed to being a reliable partner in industrial packaging, serving diverse sectors such as agriculture, cement, fertilizer, food, FMCG, and infrastructure. Leveraging decades of domain expertise, a robust manufacturing base, and a progressive leadership team, IPL aims to:

- * Expand pan-India distribution networks
- * Invest in R&D for advanced materials
- * Enhance sustainability through green initiatives
- * Elevate customer value through innovation and quality
- * Export its quality bags, specially FIBC bags to European and African countries
- * Foray into supply of various products to food processing, food distribution companies
- * Gradually transforming into circular economy model focusing on sustainability through reuse, repair, refurbishing and recycling the plastic waste collected from various sources.

Our Board of Directors

Our Board of Directors comprises visionary leaders and industry experts who drive our company's growth, innovation, and long-term success. Their strategic guidance and vast experience enable us to maintain operational excellence, customer satisfaction, and market leadership.

Board of Directors

Mr. Ramesh Kumar Rateria, Chairman & Managing Director

Mr. Ashok Kumar Rateria, Whole Time Director

Mr. Chandan Sengupta, Independent Director

Ms. Anupma Kashyap, Independent Director

Mr. Sushil Kumar Sultania, Independent Director

Our Team

Mr. Ramavatar Kankani, CFO

Ms. Chaman Chhajer, CS

Mr. Chittaranjan Sahu, Production Manager

Mr. Vineet Kumar Sharma, Business Development Head

Mr. Binod Prasad, Marketing

Mr. Debu Pradhan, Quality & Production

DEALERS AND IMPORTERS OF VIRGIN & REPROCESSED PLASTIC GRANULES

Rateria

GROUP OF COMPANIES

We are the major importers of PP, HDPE, LDPE, LLDPE, PVC, EVA, SAN, PC, EVA, PS, Metallocene, Reprocess Granules, PET, Master Batches.

We imports from major Eastern India and major parts of world working with companies like

Advancing Sustainability : Recycle and Reuse of Polymers

We specialize in the production and development of recycled plastic compounds, focusing on PP, PS, PC, PE, and ABS. With advanced production equipment and a standardized manufacturing process, we are dedicated to continuous improvement.

Our success is driven by:

- Innovative application programs.
- Skilled and dedicated human resources.
- Strategic international expansion.
- These factors position us as a key player in the recycled plastic compounds industry.
